Biographies

Mr. Lundahl has reviewed the biographical accounts of [REDACTED] and finds them to be, from his knowledge, quite accurate and descriptive of these gentlemen and consistent with his experience with them. He could provide additional details such as the dates of meetings here in the U.S. in which these named gentlemen participated and some of the committee jobs that they have held in the [REDACTED] over the past years. However, he is not sure whether this supplementary amount of small detail would in any way assist the biographical accounts as they are presently written. He does have pictures of each of these individuals and if they would be useful to you in the biographical records he would be glad to send some prints over for your retention. If we can be of any further help please let me know.
